PROFILE

B.Tech Computer Science (AI and ML) student at CHRIST University with honours in Cybersecurity. I build autonomy research platforms, applied AI products and secure software. Former developer intern at HAL and OkCredit Future Founders intern. Hackathon winner and club coordinator who enjoys turning models and algorithms into products people use.

EDUCATION

B.Tech Computer Science and Engineering (AI and ML), Honours in Cybersecurity 2024 to 2028
CHRIST (Deemed to be University), Kengeri Campus, Bengaluru

EXPERIENCE

Club Coordinator, CAADS Jul 2026 to Present · Bengaluru
CHRIST University, Department of AI and Data Science Engineering

- Coordinate club activities and technical events across AI, data science and emerging technologies with faculty and student teams.
- Organised the SLAB Hackathon, where builders prototyped self learning AI agents.

Assistant AI Trainer, SIRD Nov 2026 · CHRIST University, Kengeri
State Institute of Rural Development

- Trained participants in AI over a three day programme and demonstrated practical AI tools for everyday productivity.

Future Founders Intern, OkCredit May 2026 to Jul 2026 · Remote

- Led ShopIQ, an AI powered kirana management app, from problem discovery to a working product over eight weeks.
- Validated merchant pain points through field interviews at Bengaluru stores to shape the feature set.
- Received a letter of recommendation on completion.

Developer Intern, Hindustan Aeronautics Limited Mar 2026 to Apr 2026 · Bengaluru
Mission and Combat System Research and Design Centre (MCSRDC)

- Worked with C++ and databases with hands on exposure to aerospace engineering and industrial processes.

PROJECTS

ASTRA · AI-Driven System for Touchdown and Rover Autonomy Private research project
Python · FastAPI · PyBullet · PyTorch · stable-baselines3 (PPO) · EKF · React · Three.js · PostgreSQL

- Research platform for planetary autonomy with 6-DOF Mars and lunar powered descent, hazard aware site selection and autonomous diversion.
- Rover stack with EKF state estimation, traversability cost maps, A* replanning, pure pursuit control and energy aware routing.
- Fault detection and classification for sensor dropout, terrain misclassification, power drain and actuator degradation, with CUSUM drift detection for a sensor that lies.
- Independent safety supervisor and matched seed experiments with McNemar and Wilcoxon tests against a rule based baseline. Evolved from my AETHER-LAND project (PID vs MPC vs PPO landing).

ZeroRot · Post Harvest Loss Prevention Digital Twin zerorot.vercel.app
FastAPI · React · Three.js · Groq AI · Open-Meteo · OSRM · OpenStreetMap

- Phone app synced with a 3D simulation that follows a crop from godown storage to mandi, using live weather and real road routes.
- Spoilage prediction, sell or store recommendations, simulated AI grading and truck tracking with reroutes. 67 automated tests.

ShopIQ · AI Powered Kirana Management System github.com/Prash-2402/ShopIQ
React Native · Expo · Supabase · FastAPI · Gemini · Prophet · scikit-learn · Whisper API · WhatsApp Business API

- Full stack mobile app for stock, billing and udhar with Prophet demand forecasting and barcode based stock tracking.
- Voice input in Hindi and Kannada, WhatsApp business summaries and a profit dashboard with dead stock detection and GST tagging.

UnMask · AI Deepfake Detection unmask-nan8.onrender.com
TensorFlow · EfficientNetB0 · MTCNN · OpenCV · Flask · Grad-CAM

- Ensemble EfficientNetB0 trained on FaceForensics++ and Celeb-DF v2 reaching 94 to 96 percent accuracy. Won FOOBAR 10.0 (Cybersecurity).

PropagandaLens · Multilingual Manipulation Detector propaganda-lens.vercel.app
Python · FastAPI · Groq AI · Helsinki-NLP · React

- Detects 8 rhetorical techniques in English and Hindi with temporal analysis, explainable AI chat and PDF reports.

Port Scanner and Vulnerability Reporter
Python · Flask · Multithreading · SSE
200 thread TCP scanner with live streaming UI, service mapping and CVE flags for high risk ports. GitHub

CampusFlow AI+
React · Node.js · Supabase · Groq · RAG · n8n
Hackathon student platform with RAG over notes, AI quizzes, mock interviews and calendar automations. Live

CleanBrowse
Chrome Extension (MV3) · JavaScript · Python ML
Kid safe browsing extension that blocks unsafe sites and softens unsafe text using a custom classifier. GitHub

KAPP · AI Career Navigator
Python · Gemini 2.5 · React · Multi Agent
Multi agent system that analyses resumes and generates personal career roadmaps. Live

ACHIEVEMENTS

- **Winner**, FOOBAR 10.0 Hackathon, Cybersecurity domain (24 hours) with UnMask.
- **3rd Place**, AfterHours 1.0, DBIT Bengaluru (Oct 2026). Top 4 of 54 inter college teams in a 24 hour hackathon.
- **Runner Up**, CodeStorm 2026 Karnataka Edition, Department of ADSE at CHRIST University with UNILOX.
- **15+ hackathons** across AI, cybersecurity and product, from 24 hour sprints to 8 week programmes.

CERTIFICATIONS

- AWS Academy Graduate, Cloud Foundations · Amazon Web Services · Sep 2026 · Credential
- Getting Started with Generative AI · IBM · Oct 2025 · Credential
- Artificial Intelligence Fundamentals · IBM · Sep 2025 · Credential

TECHNICAL SKILLS

Languages	Python, C++, Java, JavaScript, TypeScript, SQL, HTML and CSS
AI and ML	PyTorch, TensorFlow, scikit-learn, Reinforcement Learning (PPO), OpenCV, LLMs, Generative AI, Gemini, Groq, Prophet, Whisper
Robotics and Autonomy	State estimation (EKF), path planning (A*), fault detection, PyBullet, Gymnasium
Web and Backend	React, React Native, Expo, Node.js, Express, FastAPI, Flask, Three.js
Data and Cloud	PostgreSQL, MySQL, Supabase, Firebase, AWS, Git, Linux, Docker
Leadership	Project planning, team and program coordination, club management, AI training
