PRAJWAL S HANGARAGI

Bengaluru, India | +91 7204557247 | prajwal.s.2h@gmail.com | linkedin.com/in/prajwal-s-hangaragi1 | github.com/Prash-2402 | prash-2402.github.io

SUMMARY

B.Tech Computer Science (AI and ML) student with honours in Cybersecurity, with internships at Hindustan Aeronautics Limited and OkCredit. Builds applied AI products, autonomy research systems and secure software using Python, PyTorch, FastAPI and React. Winner of FOOBAR 10.0 with 3 podium finishes across 15+ hackathons.

EDUCATION

CHRIST (Deemed to be University), Bengaluru 2024 to 2028

B.Tech in Computer Science and Engineering (AI and ML), Honours in Cybersecurity Kengeri Campus

EXPERIENCE

OkCredit · Future Founders Intern May 2026 to Jul 2026 · Remote

- Led ShopIQ, an AI powered kirana management app, from problem discovery to a working product in 8 weeks.
- Built Prophet based demand forecasting, voice inventory updates in Hindi and Kannada (Whisper API) and WhatsApp business summaries.
- Validated merchant pain points through field interviews at Bengaluru stores. Received a letter of recommendation.

Hindustan Aeronautics Limited · Developer Intern Mar 2026 to Apr 2026 · Bengaluru

- Interned at the Mission and Combat System Research and Design Centre (MCSRDC), working with C++ and databases in an aerospace engineering environment.

PROJECTS

ASTRA · Autonomy Platform for Planetary Landing and Rovers Python, PyBullet, PyTorch, FastAPI, React

- Built 6-DOF Mars and lunar landing simulation with hazard aware site selection and autonomous diversion.
- Rover autonomy with EKF state estimation, A* replanning on traversability cost maps, CUSUM sensor drift detection and an independent safety supervisor.
- Evaluated adaptive control against a rule based baseline using matched seed trials with McNemar and Wilcoxon tests. PPO training pipeline included.

UnMask · AI Deepfake Detection unmask-nan8.onrender.com

- Ensemble EfficientNetB0 with MTCNN face extraction trained on FaceForensics++ and Celeb-DF v2, reaching 94 to 96 percent accuracy. Flask API for image and video analysis. Won FOOBAR 10.0 (Cybersecurity).

ZeroRot · Post Harvest Digital Twin zerorot.vercel.app

- FastAPI backend with a React and Three.js 3D world synced to a phone app. Live weather, real road routing (OSRM), spoilage prediction and sell or store advice. 67 automated tests.

PropagandaLens · Multilingual Manipulation Detector propaganda-lens.vercel.app

- Detects 8 rhetorical manipulation techniques in English and Hindi using Groq LLMs and Helsinki-NLP, with explainable AI chat and PDF reports.

Port Scanner and Vulnerability Reporter github.com/Prash-2402/Port

- Multithreaded (200 threads) TCP scanner in Python and Flask with live streaming results, service mapping, CVE flags for high risk ports and rate limiting.

LEADERSHIP

Club Coordinator · CAADS, CHRIST University Jul 2026 to Present

- Run technical events across AI and data science. Organised the SLAB Hackathon on self learning AI agents.

Assistant AI Trainer · State Institute of Rural Development (SIRD) Nov 2026

- Trained participants in practical AI tools over a three day programme.

ACHIEVEMENTS

- **Winner**, FOOBAR 10.0 Hackathon, Cybersecurity domain. **3rd Place**, AfterHours 1.0 (Top 4 of 54 teams). **Runner Up**, CodeStorm 2026 Karnataka Edition.
- Participated in 15+ hackathons across AI, cybersecurity and product.

SKILLS

Languages: Python, C++, Java, JavaScript, TypeScript, SQL

AI and ML: PyTorch, TensorFlow, scikit-learn, Reinforcement Learning (PPO), OpenCV, LLMs, RAG, Prophet

Robotics: State Estimation (EKF), Path Planning (A*), Fault Detection, PyBullet, Gymnasium

Web and Cloud: FastAPI, Flask, Node.js, React, React Native, PostgreSQL, Supabase, AWS, Docker, Git, Linux

CERTIFICATIONS

AWS Academy Graduate, Cloud Foundations (2026) · IBM Getting Started with Generative AI (2025) · IBM AI Fundamentals (2025)
